Holds and volumes 2026

Catalog

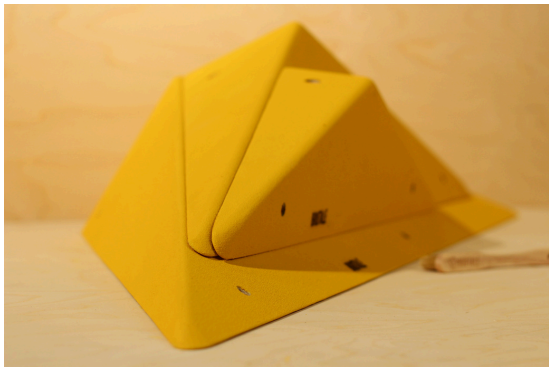

Built by climbers, for climbers.

At Brutale, we don't just make climbing products — we live them. Our team is made up entirely of climbers who've been on the wall since childhood. We design, build, and test everything ourselves.

Every shape, every screw, every edge is driven by real experience. Wood is our craft, and volumes are the soul of modern movement on the wall. Our volumes are made to inspire creative setting, powerful climbs, and unforgettable boulders.

We do this because we love climbing. It's that simple. And we stand behind every product we make.

Modular and stackable design - precise shapes allow stacking and combining multiple volumes to create new lines and angles.

Modern shapes - Their wide, stable surfaces are ideal for initiating powerful jumps and dynamic sequences or sneaky footholds on slabs.

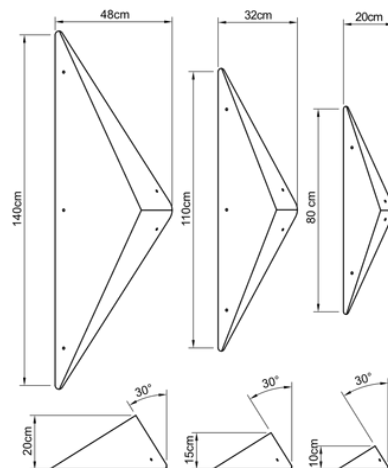

CHIMERA

Chimery are slim, low-profile climbing volumes with a clean, modern design.

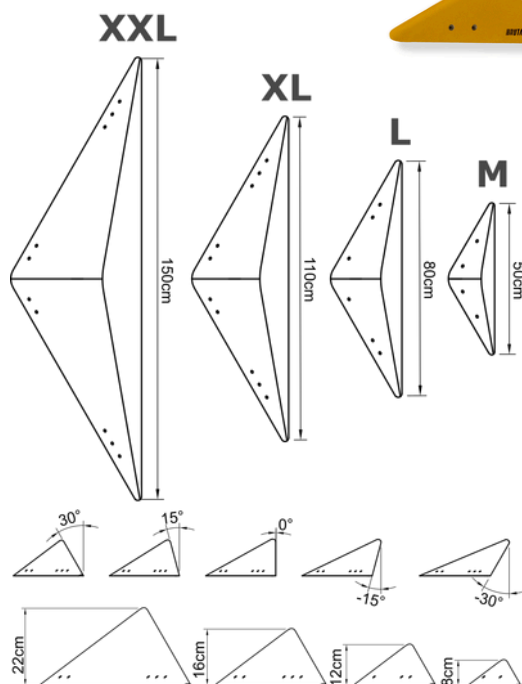

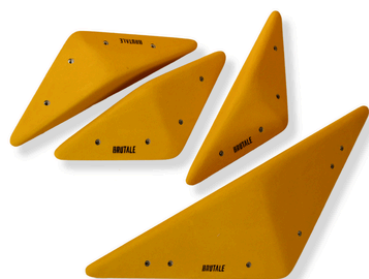

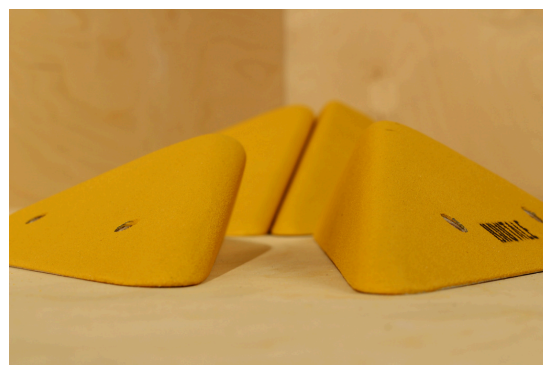

XXL XL L

VALKYRA

Valkyra is our multifunctional volume shape with a variety of angles and sizes. Designed to work both as volumes and oversized holds, they're ideal for compression moves, dynamic jumps, and powerful bouldering.

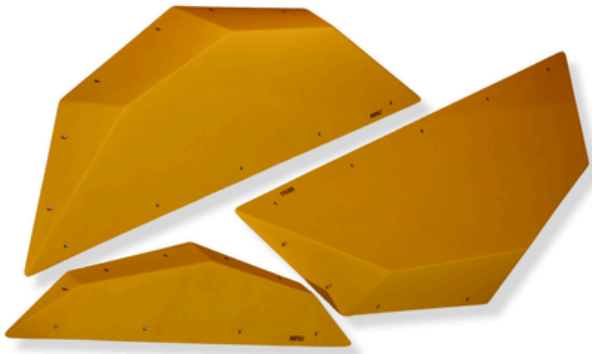

Variety of sizes and angles - options for every style whether you're setting for smears, toe hooks, slabs, or explosive launches, Valkyra opens the door to your creativity.

Embedded washers - easy to set up and designed for longevity, the internal metal washers prevent damage over time.

ZAVAKYS

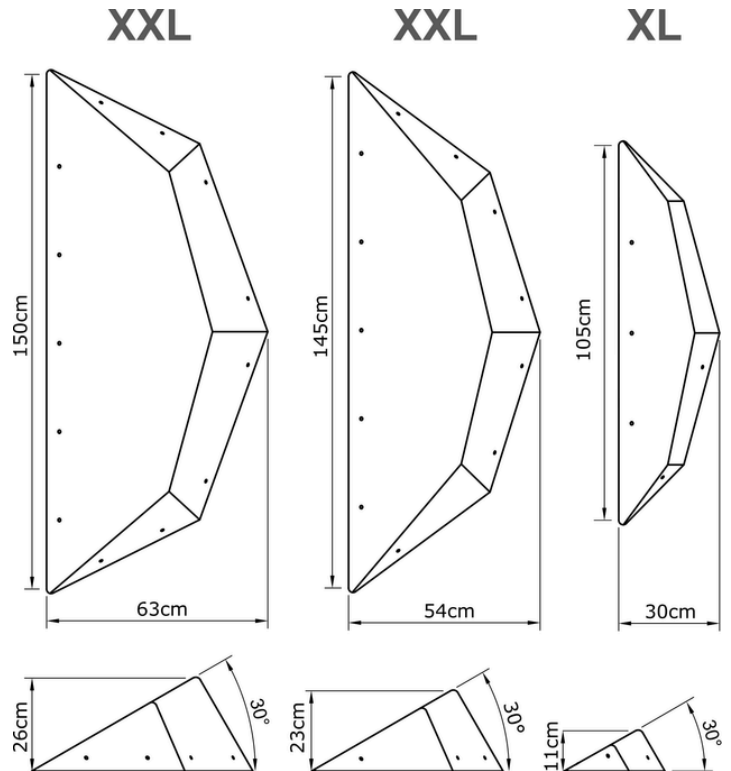

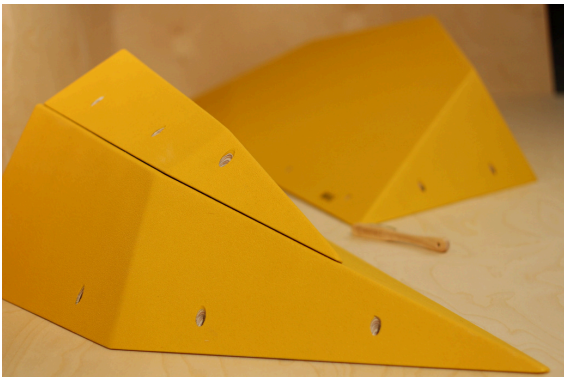

Zavakys are large, ultra-flat climbing volumes created in collaboration with top Slovak routesetter David Zavacký. Designed for modern competition-style boulders full of uncertainty, crawling, and creative movement, they offer a unique blend of function and aesthetic.

Minimal profile - Encouraging body tension and creativity. Set competition style and modern movements.

Seamless stacking - easy to create custom features and fresh lines.

Durable screw-on mounting - with metal washers reinforced for repeated use and secure attachment in high-traffic gym or comp settings.

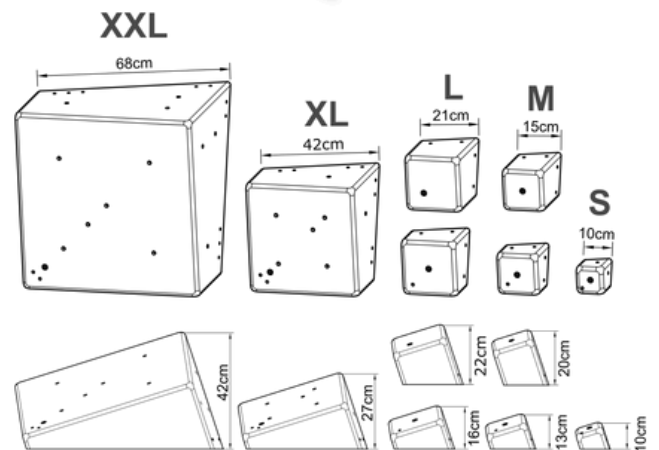

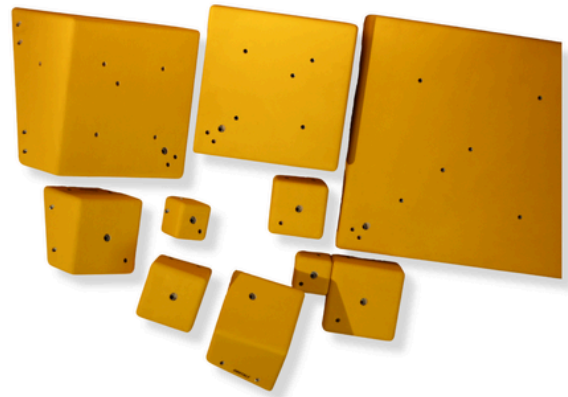

Stackable design – build massive 3D shapes by mounting cubes on top of each other or combine with other holds and volumes.

Choose between bolt-on (threaded inserts) or screw-on (wood screws) mounting – depending on your wall setup and routesetting preferences.

CUBES

Perfect for creating creative hobby movement lines on your wall.

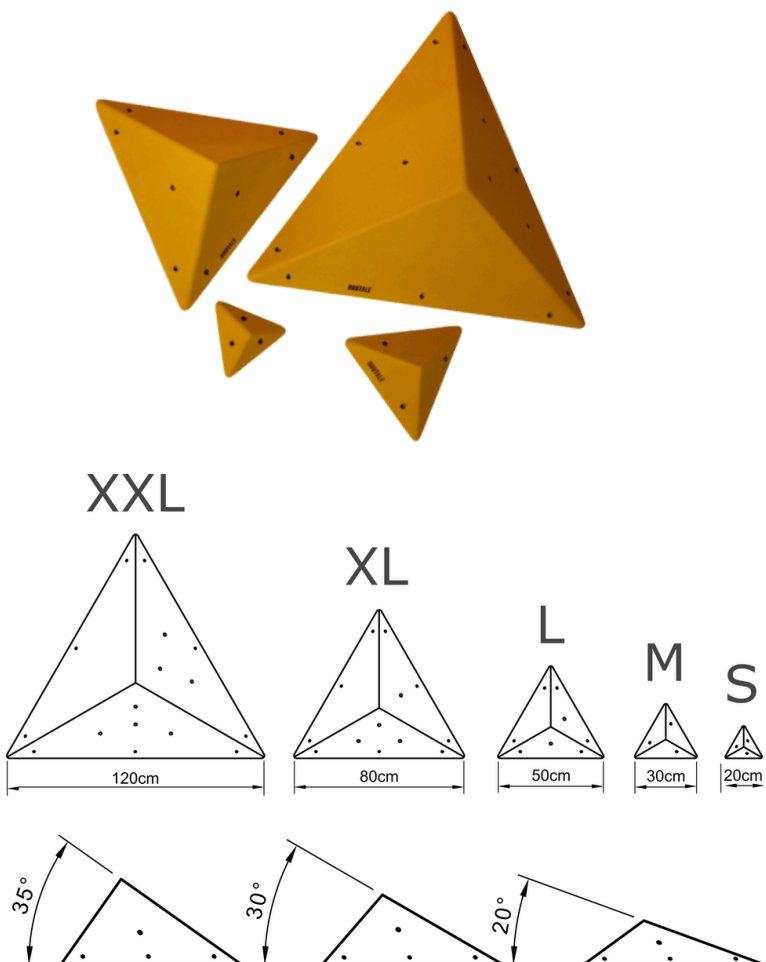

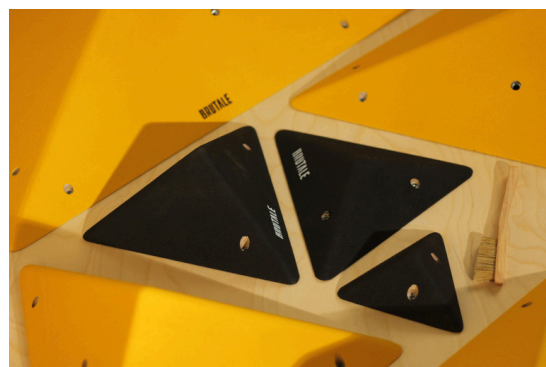

PYTAGORAS

Pythagoras are triangular volumes in three angles – 20°, 30° and 35°. They are a standard on every climbing wall. Versatile, reliable, and they perfectly complement any profile.

The most versatile elements – shape and angle offer a wide range of uses – from technical climbing and modern boulders to complementing holds on overhangs.

Embedded washers – easy to set up and designed for longevity, the internal metal washers prevent damage over time.

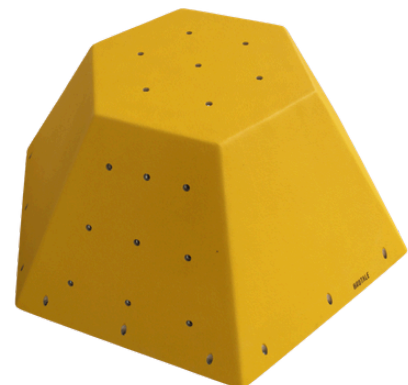

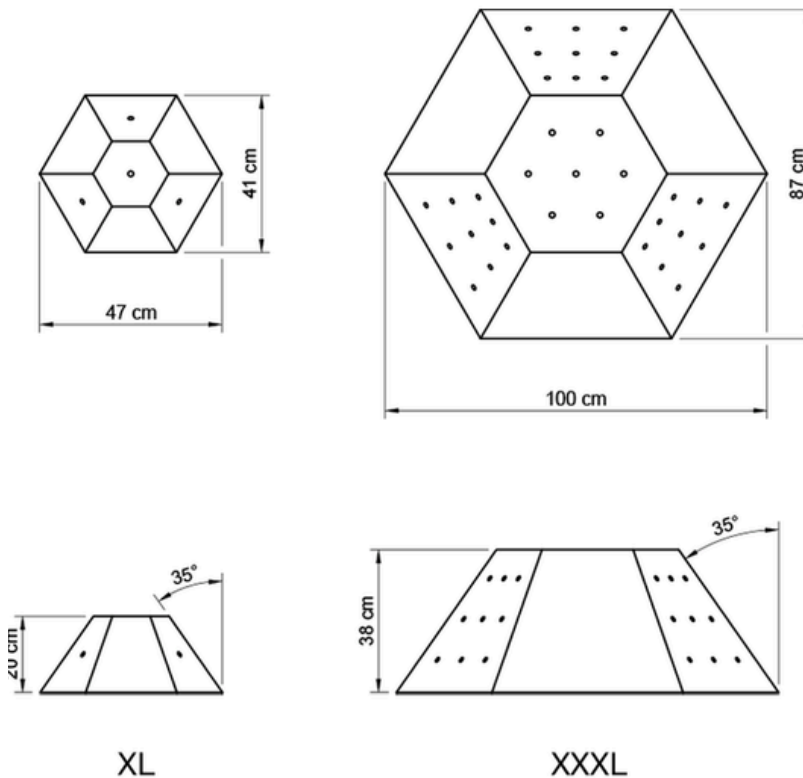

TITAN

TITAN and Titanik are huge volumes designed for overhangs and cave-style profiles. Ideal for powerful boulders, compression, and full-body climbing.

Huge wooden volumes - ideal for brutal compression boulders, full-body climbing, creating ladder-style sequences or making an overhang easier.

Epic icicle-shaped feature - Titanik can be stacked on Titan, creating a massive icicle.

Holds Set - includes 10 smaller holds (sizes S and M), 6 larger holds (sizes L and XL), and one oversized hold (size XXL).

Wood or ColorGrip - Available either in skin friendly wood or with gripy surface.

OŠTIEPKY

A set of various-sized pinchy holds ready for training or commercial setting.

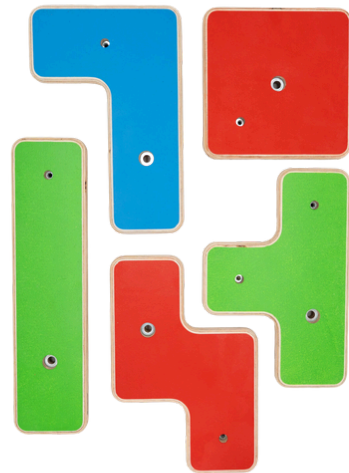

TETRIS

Iconic playful hold design that gets kids excited instantly motivates them to climb.

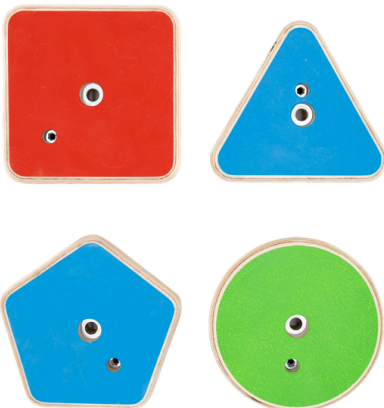

Set of 5 wooden climbing holds - takes inspiration from an iconic arcade game, turning any climbing wall into a world of fun and imagination.

GEOMETRIC

Simple geometric shapes and bold colors naturally draw children into movement.

Set of 4 wooden climbing holds - features geometric shapes, allowing you to gradually build a colorful and functional home climbing wall. The climbing wall becomes a game they love coming back to.

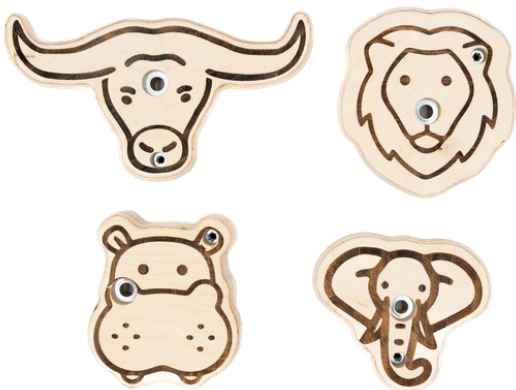

Supporting movement through play - physical activity becomes part of a game that develops coordination, balance, and self-confidence. The result is more activity without pressure, fostering a positive relationship with movement from an early age. Every new grip is a small victory that motivates the child to take the next step.

ANIMALS

Animal-themed climbing holds that transform your climbing wall into a safari adventure.

Set of 4 wooden climbing holds -

Children connect with them immediately, making every climb a playful mission to reach their favorite animal. Certain shapes like the bison and the lion are suitable for children as young as two years old.

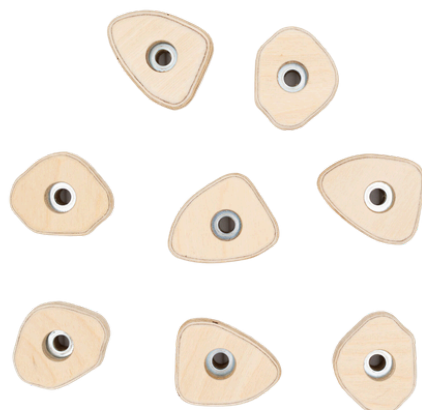

Multiple grip options - Various edges and angles allow these holds to be gripped in multiple ways - from the side, the top, or the rim. They naturally vary the difficulty on your home climbing wall, promoting both technique and creativity.

STONES

Wooden climbing holds for home walls in a natural finish.

Set of 8 wooden climbing holds -

Practical climbing holds for home walls with a comfortable grip for smaller hands. For adults, they serve as challenging crimps or reliable footholds. Thanks to their pebble-like shape, they are perfect for creating both simple and more technical moves.

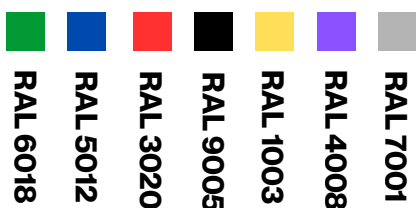

CUSTOM LOGO DUAL TEX

Make your brand climbable.

With our custom logo engraving option, you can add your unique identity directly onto our dual-texture volumes. Stand out from the crowd – not just visually, but physically. A bold way to showcase your brand where it truly belongs: on the wall.
