

## PORTFOLIO OF SERVICES

### CLIMBING WALLS

Manufactured in our own production facilities in Zvolen. We design and build walls with an emphasis on architecturally pleasing and functionally climbable solutions.

#### Technology a materials

- CNC-formatted panels made of 18 mm thick water-resistant birch plywood
- Wooden supporting structures made of KVH beams with C24 strength certification

#### ColorGrip surface treatment

Two-component resin surface with sandblasting applied directly during production. Quick installation without cluttering your space. Option to mix shades. Also available in a lacquered finish with visible wood veneer.

#### Project and technical documentation

Architectural design and 3D model according to the specific space. We prepare assembly and cutting plans, static calculations.

#### Focus on bouldering

We specialize in bouldering walls. We believe that bouldering is the future of indoor climbing. It does not require constant supervision or inspection of safety equipment. It is safe, social, fun, and accessible to the general public. The climbing challenge becomes a collective experience.

#### Modular solutions

Our modular walls are an economical choice for smaller spaces. They allow you to create high-quality climbing conditions for both children and adults. Suitable for spaces with a minimum height of 2.4 m. The key to a successful climbing wall is choosing the right holds.

Climbing walls are constructed in accordance with standard **EN 12572-1:2017**.

## CLIMBING HOLDS

BRUTALE designs and manufactures its own wooden climbing holds, specifically developed for **children** and **commercial** climbing.

They are characterized by a pleasant grip, playful shapes, and are intended for indoor use.

In addition to our own production, we also supply products from other EU manufacturers.

**Polyurethane** and **polyester** holds from manufacturers in the Czech Republic, Spain, and Bulgaria. All with proven UV stability and high load resistance.

**Choosing** holds and volumes is a complex process that we are happy to take care of on your behalf. We consider your target group and the color scheme of the space, allowing us to meet the potential of your wall.

## CLIMBING VOLUMES

Our volumes are a means to expand possibilities and create moves that cannot be built solely on panels of the wall.

**The surface is double sandblasted** for consistent and durable grip. Featured with rounded edges and galvanized washers for long-term durability.

You can find more information about our volumes and holds in **the catalog of holds and volumes**.

## MATS AND PADDING

We deliver and install padding from the certified manufacturer FLIPP.

**PVC** cladding, for walls in exterior, **carpeted** for interior ones.

Available in a variety of colors. Thickness: 20–30 cm.

### Certification of mats and padding:

1) Impact: EN 12572-2:2017 Artificial climbing structures. Safety requirements and test methods for bouldering walls

2) Impact: - AS 2316.1-2009 Artificial climbing structures and challenge courses. Part 1: Fixed and mobile artificial climbing and abseiling walls.

3) Impact: - AS 4422:2016 Playground surfacing – Specifications requirement and test method.

4) Fire retardancy: EN ISO 9239-1:2010 Reaction to fire tests for floorings

We have **our own team** of climbing route setters who not only install climbing routes, but also understand them. Each and all are trained in working with materials, anchoring, and safety. We also provide **revisions** of climbing walls with ropes. .

Our **route setters** will prepare routes or boulders that make sense for your target group, whether it's children, hobby climbers, or performance training. We can adjust the colors, style, and difficulty as needed, working with statistical data.
